Illustrator CC is the latest version of Adobe Illustrator. If you are working on a starter computer, I highly recommend that you go for an older version. Adobe offers a 15 day trial of all products. So if you are not sure if you will like it, try the trial out first! The only draw back is that trial versions don't come with any instruction manual. So make sure to bookmark this tutorial!

Step 1: Introduction Take a look at the project and take a moment to understand what you will be doing. Read the concepts and follow along step-by-step if you have Adobe Illustrator. After you complete this exercise, you will be able to demonstrate an understanding of these techniques. Step 2: Project Introduction Take a look at your final goal or your final project. Step 3: Getting Started Open Adobe Illustrator CC 2017. Once the program is open, create a new document by clicking on File > New. Set up the options as shown below. Click OK when finished! Next, create another new document by clicking on File > New. Set up the options as shown below and click OK when finished! Start out by making the selection box bigger! Step 4: Using Select Tool Click on the select tool (V) and select the main shape (red ellipse) within your second layer (red layer). Don't forget to hold down the shift key while selecting your main shape! Now with your main shape selected, click on canvas and drag it downwards. It's time to start developing the design! Step 5: Fill Your Shape Select your main shape (red ellipse) and then select the fill tool (G). Click on your fill tool and set up the options as shown below. Now click inside of your selection box and start filling it with a dark grey color. After you've selected the fill tool, click inside of your selection box and use a light grey color to fill in most of it.
