You can choose to save them to yourself, exchange or sell, or even craft a higher rarity items using them.. Lack of the ability to change controls and the athstetics could be better, and I would like to see it being priced at about 99c-\$1.25

I would recommend if these things are fixed. Fun game , i like it :) Can you add a better music ?. Rebors - hardcore platformer about geometric figures. The unique features of each figure make the gameplay special.

Can't even switch between all available shapes when you kinda need to.

I would recommend if these things are fixed. As a Geometry Dash player, its really interesting to see similar contrass games out there like Geometry Dash, this one does change things up and is interesting. If your a new to this, I'd recommend it, and if you have knowledge of Geometry Dash and do have experince and want to try something new for cheap, I also recommend this,. It's not fun at all. Don't buy this game, it's broken. Can't even switch between all available shapes when you kinda need to.
